FROM THE PRINCIPAL

Tomorrow I finish at Wellers Hill State School as I head on an overseas trip to South America. For the last two weeks during my absence Mrs Louise Hart will be acting Principal.

Many thanks to the parent community for the wonderful welcome and the support during my six months at the school.

Wellers Hill is a fantastic school with the students being given the opportunity for excellence in many areas including language studies, visual arts, music and sporting programs.

The staff do an amazing job of supporting the children and the high standards of academic excellence are well recognised in our region.

All the best for a safe Christmas and best wishes for 2015.

Wellers Hill School Christmas Appeal

Wellers Hill State School traditionally participate in a Christmas Donation Appeal for the Salvation Army. We are participating in this appeal once again for Christmas 2014. Donations, large or small, can be left at the school office until Wednesday 10 December. Items requested are non-perishable food items and toys (unwrapped). Many thanks for the generosity of those families who have already contributed.

G. Coleman

FROM THE GUIDANCE OFFICER

The Importance of Sleep

We all know how sleep affects our life – a good night sleep makes life's dilemmas easier to cope with while a bad night's sleep (or limited sleep) makes us grumpy, lethargic and mostly no fun to be around. Sleep problems in kids don't just drive parents batty, they also affect children's health and development, including academic performance, growth and even immunity.

Sleep researcher and psychologist Dr Sarah Blunden, from the Centre for Sleep Research at the University of South Australia, told a recent psychology conference in Melbourne (2010) that sleep problems – which can be medical or behavioural – can affect memory, attention, thinking ability and behaviour. For children there are also studies that link bed wetting with sleep problems.

The most common cause of medical sleep problems is snoring and obstructive sleep apnoea (holding the breath), but sleep walking or night terrors, periodic limb movement disorder or restless leg syndrome and other conditions, such as asthma and eczema, can also affect sleep.

Behavioural sleep problems can include difficulty falling or staying asleep, resisting going to bed, changing sleep hours (like teenagers do), and getting out of bed during the night.

So what is enough sleep?

- Toddlers need 12 to 14 hours sleep daily
- Primary school kids 10 to 12 hours.
- Adolescents need about 8½ to 9½ hours of sleep per night

Research suggests without this sleep, children don't function as well. They're more irritable, aggressive, hyperactive, fidgety, and can't concentrate or remember information, compromising learning, and exhibiting delayed response time. They get sick more and have an increased risk of accidents. We as adults can also relate to these symptoms.

DID YOU KNOW?

More than half of "asleep-at-the-wheel" car accidents are caused by tired teens.

Poor sleep can affect all of us at some time. Sleep experts recommend the following tips. Whether you be young or old or in the middle:

- Get into a routine - go to bed around the same time every night and wake up at the same time every morning
- Investigate if there are any fears or anxieties that might be keeping you/them awake.
- Before bed, do relaxation, breathing or visualisation exercises (imagine a happy place such as the beach or park)
- Do relaxing activities such as reading, drawing, listening to quiet music in the hour before bed to help wind down.
- Turn off the television (keep TV out of the bedroom), computer, electronic games and other activities in the hour before bed.
- Avoid strenuous exercise in the few hours before bed but make sure you/ your child gets plenty of exercise during the day.
- Avoid caffeine (soft drinks and coffee) and limit spicy or salty food which can cause thirst – and wake you/ your child during the night
- Encourage your child to fall asleep on their own (even from age six months - put babies down when drowsy rather than already asleep)
- Use reward systems (star charts culminating in a lucky dip or favourite outing) to motivate preschool and school-age kids, especially if they are getting out of bed or coming into your bed at night
- Install a hall or night light if your child is scared of the dark

If all else fails see a GP who can refer you/ your child to a medical specialist, sleep physician or psychologist to investigate why you or your child struggles with sleep.
